

DATAIA-CLUSTER

CONTEXT & OBJECTIVES

Created in 2017 as a Convergence Institute, the DataIA Institute has been, since 2021, the Artificial Intelligence (AI) institute of Paris-Saclay University, leading the University's AI strategy in research, education, and innovation. The Institute brings together and structures multidisciplinary expertise while strengthening the collective impact of its partners in the heart of Paris-Saclay hub. These partners are involved in cutting-edge research in AI and data science, in connection with other disciplines such as the humanities and social sciences and their applications. The Institute now mobilizes more than 800 researchers and faculty members from 47 laboratories within the University's perimeter. The consortium includes universities, national research institutes, and French « Grandes Écoles ».

In May 2024, the DataIA Institute was one of the nine winners of the "AI-Cluster" call for expressions of interest-centers of excellence in AI research and education certified under the France 2030 initiative. This initiative aims to support the emergence of world-class AI training hubs, ensuring the development of skilled talent to meet industry needs, a key priority of the France 2030 investment plan. This Cluster brings together 14 higher education institutions and research organizations, as well as an external continuing education company (CentraleSupélec Exed), the Jacques Hadamard Mathematics Foundation (FMJH) and Gustave Roussy.

Moreover, the institute leads, since 2022, the SaclAI-School project, which won the « Compétence et Métiers d'Avenir » (CMA). This project SaclAI-School improves and develops training in Artificial Intelligence, from acculturation to AI expertise. In collaboration with its founding members, DataIA contributes to developing AI education programs at all levels (high school, Bachelor's, Master's, PhD, continuing education, certification, specialization), tailored to the required level of AI expertise in each discipline (awareness, beginner, or expert). To promote student success, scholarship programs based on social criteria and excellence (MixtAI, ReconvertAI) have been launched, along with tutoring and recruitment platforms.

DATAIA INSTITUTE ECOSYSTEM

17 FOUNDING MEMBERS

6 ASSOCIATE MEMBERS

+46 industrial partners
(19 large companies - 27 SMEs)
